WITH US

MACKELLAR

WE ARE MACKELLAR

At MacKellar we provide heavy earthmoving equipment and labour solutions for tough and uncompromising environments, and we have a proud history of working on both mining and civil earthwork projects around Australia.

MacKellar Group prides itself on the quality and commitment of our highly engaged and talented people. Since 1966, our success has been driven by our relentless focus on developing a healthy workplace culture that values, supports, and motivates our employees to deliver their best work.

At MacKellar, our overarching goal is to attract, engage, develop, and retain the best talent. Our team of inspired individuals plays a pivotal role in driving our growth trajectory and seizing new opportunities in emerging markets.

We are dedicated to fostering a workplace environment that embraces diversity, inclusiveness, and equality. We firmly believe that a diverse workforce fuels creativity, productivity, responsiveness, and competitiveness, ultimately creating value for all our stakeholders. We have also embedded a strong safety culture into all aspects of our business, ensuring the well-being of our employees and contractors.

JOIN US

Whether you are an experienced professional, a skilled operator, a cadet, an apprentice, or someone new to the industry, we have a place for you.

Visit mackellargroup.com.au/people-careers to learn more about our current openings and start your journey with us.

Productive Partnerships

Productive partnerships are at the heart of what we do and MacKellar prides itself on developing strong and reliable relationships with our clients.

From very humble beginnings, MacKellar has grown to become a trusted and reliable partner for large scale projects across Australia, fuelled by our proven capacity and capability to deliver.

Strong values, commitment to clients, safety culture and a focus on developing young talent remains at the core of what we do.

Our loyal and motivated team of maintenance and production specialists are our greatest asset and maintain the highest standards for our equipment to ensure success in our partnerships. This is backed up by our extensive fleet of top-quality heavy machinery, that continues to grow year on year.

FORGE YOUR FUTURE WITH MACKELLAR

Cadet Program

Mackellar's Cadet Program offers a range of activities and career opportunities for undergraduate students pursuing Mining Engineering and Mechanical Engineering degrees.

The primary objective of the program is to establish a developmental pathway for cadets to evolve into future leaders, and each recipient of a Mackellar Cadetship will benefit from ongoing support, coaching, and mentoring provided by our experienced engineering teams.

Additionally, recipients receive remuneration for their work experience during their studies.

The Mackellar cadetship program is specifically tailored to support undergraduates from regional Queensland in successfully completing their engineering studies while gaining invaluable paid work experience during their vacation breaks.

Recipients of Mackellar's Cadetship Program can apply for Mackellar's Graduate Program on completion of their degree.

MACKELLAR

Graduate Program

MacKellar's Graduate Program is a 2-year Graduate program intended to take Mining and Mechanical Engineering Graduates through an intensive 2-year learning and development program to further develop all the necessary skills required to be a highly successful Mining or Mechanical Engineer. The Graduate program also includes leadership training via the MacKellar Leadership Academy.

Apprenticeship Program

MacKellar Group's Apprenticeship program is aimed at new-to-industry applicants and is extremely competitive.

Recruitment takes place once a year for MacKellar's Apprenticeships which commence in January of the following year. You can stay up to date with our application open dates by following our website and social media.

Successful applicants work full time and get paid while learning in a four-year competency based program, which combines workplace-based training combined with formal learning through Hastings Deering Registered Training Organisation (RTO).

From the second year onwards, participants will gain experience working at various mine sites and learning invaluable job skills to broaden their industry experience. On completion of the program each apprentice will receive a nationally recognised qualification.
